Sahan K.P.

SOFTWARE ENGINEERING STUDENT

[Your Email] • [Your Phone Number] • [Your LinkedIn/GitHub] • [Your Location]

PROFESSIONAL SUMMARY

Software Engineering student with practical experience in Python, Java, JavaScript, HTML, CSS, SQL, MySQL, Git, and GitHub. Highly interested in software engineering, artificial intelligence, machine learning, and computer vision. Experienced in developing robust software projects, REST APIs, databases, and AI-based applications.

TECHNICAL SKILLS

Python **Java** **JavaScript** **HTML / CSS** **SQL** **MySQL** **Git / GitHub** **REST APIs** **FastAPI**
Computer Vision **YOLO** **OpenCV** **Machine Learning**

KEY PROJECTS

AI Resume Analyzer

- Developed an AI-powered resume analysis application that compares resume content with job descriptions and calculates a job match score using natural language processing and semantic similarity.

Technologies: Python, FastAPI, Sentence Transformers, Scikit-learn, HTML, CSS, JavaScript

Elephant Detection & Early Warning System

- Engineered an AI-based wildlife protection system using computer vision and YOLO for real-time elephant detection near railway tracks.
- Implemented warning signal mechanisms using long-range wireless communication (LoRa).

Technologies: Python, YOLO, Computer Vision, OpenCV, LoRa

SOFTWARE DEVELOPMENT EXPERIENCE

- Developed responsive web applications and backend solutions using Java, Python, and MySQL.
- Designed and integrated RESTful APIs for database management and system communications.
- Utilized Git and GitHub for source control management and team collaboration.
- Implemented computer vision and AI solution models to solve real-world problems.

EDUCATION

BSc in Physics and Electronics

University of Kelaniya

AREAS OF INTEREST

Software Engineering • Artificial Intelligence • Machine Learning • Computer Vision • Web & Backend Development
